### **DETAILED ACTION**

1. Applicant's January 30, 2006 Amendment has been reviewed. The previous October 31, 2005 rejection is withdrawn pursuant thereto.

#### ***Claim Rejections - 35 USC § 103***

2. Claims 1-8 and 39-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogasawara, US 6,868,392.

Ogasawara discloses a computer implemented methodology for transacting business over a network comprising at least one computer, inputting price, e.g. 274 and non-price buying criteria, e.g. 276, for a product or service by a buyer, e.g. 300, correlating deals, e.g. 136, offering and outputting a plurality of deals, e.g. 302, and notifying the buyer of the of the product or service when the criteria does not match the seller, e.g. 110, criteria. Ogasawara does not explicitly disclose notifying the seller of the product or service when the criteria does not match the seller criteria. However, it appears Ogasawara does leave open this feature, e.g. col. 12, lines 19-60. Official Notice is taken that notifying sellers of when a product or service criteria does not match the buyer criteria has been common knowledge in the product/service commerce art. To have provided notification to the seller of the product or service when the criteria does not match the seller criteria for Ogasawara would have been obvious to one of ordinary skill in the art. The motivation for having done such is that alerting either party to potential trade barriers facilitates further commerce, e.g. added sales, and this has been long a standard motivational tool for sellers/buyers of products/services.
